Founding Product Engineer

Product Engineer with a founder mindset. Comfortable with ambiguity, async work and startup chaos.

Experience

Product Engineer @ [fashionwords](#) 2025 - 2025

- . Migrated long-form Excel workflows into a production-ready SaaS for fashion copywriters
- . Built the MVP in weeks, prototyped UX based on direct user feedback
- . Reduced cost-per-SKU by 30% (\$10 → \$7)

Founding Engineer @ [evalify.ai](#) 2024 - 2025

- . Built AI MVP in 2 weeks: LLM pipeline that scores new ideas for patent infringement risks using RAG + custom retrieval.
- . Supported \$15k in B2B sales within 3 months, onboarding 150+ customers.

Cloud Architect @ [audacia.co](#) 2021 - 2024

- . Designed AWS infra to onboard e-commerce acquisitions with minimal friction (flagship: 500k users, 1M visits/month, 5k orders/day)
- . Set up monitoring, auto-scaling, disaster recovery, and cost-optimization workflows.
- . Enabled non-technical teams to manage infra with custom tooling

Full-Stack @ [thewavestudio](#) 2019 - 2021

Tech Co-Founder (closed) 2018 - 2019

- . Grew to \$5k MRR and 200 customers in 30 days.
- . Built automation engine handling 600 concurrent jobs 24/7 (Node.js, Docker).

Freelancing

- . Delivered SaaS projects end-to-end with fast iteration and solid infrastructure.
- . Built scalable VoIP backend (Asterisk, 500+ calls/hr) and automated call post-processing.
- . Set up cloud pipelines, CI/CD, and Docker for clients on AWS and DigitalOcean.
